

ULTRA-LUBE™ IMX

Blend of amides of fatty acids and fatty acid derivatives

Typical Properties

Appearance		Beige pastilles ^[1]
Specific Gravity		1.1
Dropping Point	°C	65
Physiological behaviour		Refer to Safety Data Sheet
Storage stability		At least 2 years under normal conditions

Packaging

25 kg polyethylene bag

Product Description

ULTRA-LUBE™ IMX is a highly effective internal lubricant and dispersing aid for specialty elastomers, like HNBR, XNBR, ECO and exotic polymers.

ULTRA-LUBE™ IMX does not lead to excessive shrinkage after post curing process due to its low volatility chemical composition.

ULTRA-LUBE™ IMX improves mould and extrusion flow, prevents sticking on metallic surfaces and greatly enhances surface feel and finish of vulcanisates.

Dosage

1 to 3 phr

^[1] Our products are made from natural based raw materials and exhibit different shades. Depending on storage conditions and period the products may develop discoloration. These color variations do not deteriorate the product effectiveness.

The information and data contained in this data sheet are believed to be correct based on our best knowledge. Therefore, any information is given on condition that users shall make their own assessment of suitability of the product for a specific purpose. We accept no liability for any use or application unless explicitly stated by us. These data are not to be considered as specification.
