

Technical Data Sheet

ULTRA-LUBE™ ZnSt**Zinc stearate**

Typical Properties

Appearance		White to beige pastilles ^[1]
Melting Point	°C	123
Physiological behaviour		Refer to Safety Data Sheet
Storage stability		At least 2 years under normal conditions

Packaging

25 kg polyethylene bag

Product Description

In rubber compounds, **ULTRA-LUBE™ ZnSt** can be used as an internal lubricant.

In plastic compounds, **ULTRA-LUBE™ ZnSt** is used as a stabilizer but it works also well as lubricant and improves the surface finish of moulded parts.

Dosage

1 to 5 phr for rubber,

0.25 to 1.0% for plastics

^[1] Our products are made from natural based raw materials and exhibit different shades. Depending on storage conditions and period the products may develop discoloration. These color variations do not deteriorate the product effectiveness.

The information and data contained in this data sheet are believed to be correct based on our best knowledge. Therefore, any information is given on condition that users shall make their own assessment of suitability of the product for a specific purpose. We accept no liability for any use or application unless explicitly stated by us. These data are not to be considered as specification.

All values stated in the properties are typical numbers only.
