

ULTRA-PLAST™ WF519**Esters of special fatty acids and selected amides**

Typical Properties

Appearance		Beige pastilles ^[1]
Dropping Point	°C	130
Physiological behaviour		Refer to Safety Data Sheet
Storage stability		At least 2 years under normal conditions

Packaging

25 kg polyethylene bag

Product Description

ULTRA-PLAST™ WF519 behaves as excellent internal lubricant for WPC applications. It significantly increases the output and improves the surface appearance of the finished articles.

ULTRA-PLAST™ WF519 improves the dimensional stability of the extrudate and lower reject rate could be expected.

ULTRA-PLAST™ WF519 contains no metal ions, thus very suitable for use when coupling agent is present in the WPC compound recipes.

Dosage

1 % to 5 %

^[1] Our products are made from natural based raw materials and exhibit different shades. Depending on storage conditions and period the products may develop discoloration. These color variations do not deteriorate the product effectiveness.

The information and data contained in this data sheet are believed to be correct based on our best knowledge. Therefore, any information is given on condition that users shall make their own assessment of suitability of the product for a specific purpose. We accept no liability for any use or application unless explicitly stated by us. These data are not to be considered as specification.
