

Technical Data Sheet

ULTRA-PLAST™ WF520F

Mixture of fatty acid esters and amides on inorganic carriers

Typical Properties

Appearance		Beige pastilles ^[1]
Dropping Point	°C	80
Physiological behaviour		Refer to Safety Data Sheet
Storage stability		At least 2 years under normal conditions

Packaging

25 kg polyethylene bag

Product Description

It performs and functions similarly to **ULTRA-PLAST™ WF520F** as internal and external lubricant for WPC applications. A smoother surface finish is expected.

Dosage

2 % to 5 %

^[1] Our products are made from natural based raw materials and exhibit different shades. Depending on storage conditions and period the products may develop discoloration. These color variations do not deteriorate the product effectiveness.

The information and data contained in this data sheet are believed to be correct based on our best knowledge. Therefore, any information is given on condition that users shall make their own assessment of suitability of the product for a specific purpose. We accept no liability for any use or application unless explicitly stated by us. These data are not to be considered as specification.
